

## ECLIPSE MICROPEN™ MICRONEEDLING CONSENT FORM

### Description of the Procedure:

The Eclipse Micropen skin needling system allows for controlled induction of the skin's self-repair mechanism by creating micro "injuries" in the skin which triggers new collagen synthesis. The result is smoother, firmer, and younger looking skin. Skin needling procedures are performed in a safe, and precise manner with the use of the sterile, disposable Micropen needle head. The procedure is normally completed within 30-60 minutes depending on the required treatment, and anatomical site.
